**DUAL CHAMBER POWER BRAKE CONVERSION KIT**

This setup utilizes a new power brake booster with increased sensitivity, new large capacity dual chamber master cylinder, specially designed mounting bracket to allow direct bolt in while retaining original brake pedal assembly and clearance of the shock tower.* Note: Booster requires a minimum 15 inches of engine vacuum pressure at idle for maximum stopping power. Some high performance high lift camshafts may not create enough vacuum. Stock engine vacuum pressure is 18 inches. 1 year warranty. Picture for reference only. Check website for actual picture of each kit. Will not fit cars with factory power brakes. Installation instructions are not included as this kit should be installed by a trained professional. We recommend part number PBC-MCL on the following page to ease installation. Early cars may also require a brake distribution block. *Note: PBC-M1 & PBC-M2 require notching factory shock tower brace, therefore an Export Brake is recommended.

RADIATOR CAP WITH ELECTROLYSIS PROTECTION
A special radiator cap that includes a sacrificial magnesium anode that protects aluminum and other soft material engine components from electrolysis. Electrolytic Metal Erosion (EME) is slowly destroying your engine components. EME attacks timing chain covers, radiators, heater cores, intake manifolds, freeze plugs, head gaskets, thermostat housings even cylinder heads causing premature failures. By allowing EME to attack the sacrificial anode, the “Rad Cap” protects your engine while driving or in storage.

OVERHEAD CONSOLE ASSEMBLY
A beautiful reproduction of a rare option. The console base is made of vinyl and urethane with exact details. We have installed our maplight switch and light housing with our beautiful chrome bezels. Includes wiring harness and mounting screws. Mounting brackets available separately, please refer to the “Interior” section.

RED ACCENT LIGHT
Our CCFL light shines red light that will not distract the driver at night but will bring embroidered floor mats to life. We encase our light in a tough clear plastic housing that can be mounted just about anywhere inside the car. Designed to be used under the dash or under seats, this light can also be mounted in the trunk or temporarily under the hood to show off these areas.

INTERIOR ELECTRICAL SWITCHES

COURTESY LIGHT SWITCH
Available in two finishes! A white finish that is an exact reproduction of the original Ford part, or a new chrome finish.

All our 68-70 switches feature the “Autolite” logo. Note: Our 68-70 versions are the 2 pin type. Many 1970-73 cars used 3 pin type switches for optional door ajar feature.

COURTESY LIGHT SWITCH SOCKET
This plastic socket is very brittle & almost always breaks when installing a new door jamb switch. Does not fit cars with door ajar option. Simply install by carefully breaking the old brittle plastic socket apart with pliers, remove, and plug wire leads into the new socket.

IGNITION SWITCH
Made for us by the vendor that owns the original tooling, for a truly accurate piece. Switches do not include bezels.

IGNITION SWITCH PIGTAIL
Correct As Original. Repair harness that requires splicing.

IGNITION SWITCH RETAINER
A “must have” part when installing an ignition switch. Zinc plated for years of service.

TURN SIGNAL FLASHER
High quality replacement parts, may not appear original. Also used for emergency flashers.

HORN SWITCH
Fits deluxe or standard 2 spoke wheel.

IGNITOR CONVERSION

Never change points again, plus increase horsepower and improve fuel economy. Fits entirely under the distributor cap, with no “black box” to clutter the engine compartment. Installs in minutes, and is completely hidden. Other benefits: Test results show the Ignitor delivers twice the voltage to the spark plugs. No limits to coil and spark energy (spark energy is limited by the coil). A 2 to 1 improvement over “point type systems” in current fall time. Stable timing with no need for periodic adjustments. Increase spark plug life by 2 to 3 times. No contacts to burn, pit and corrode. No moving and rubbing parts to wear out. Better fuel weather performance.

HIGH POWER IGNITOR CONVERSION

The Ignitor II takes the Ignitor a step further by adding a powerful new microcontroller, that controls the dwell period, for the best possible spark over the entire RPM range. Ignitor II offers enhanced performance levels only found in more expensive box type ignition systems. Compared to point type systems Ignitor II develops on average 4 times more available energy between 3,000 and 5,000 RPM, and times more available plug voltage. Higher RPM performance is improved when used with the Flame-Thrower II super low resistance 45,000 volt coil.

“CAL CUSTOM” OIL PAN
Scott Drake is proud to reintroduce the famous “Cal Custom” aluminum finned oil pan that was so popular throughout the 60’s, 70’s and 80’s. It has not been available for years, but it is back again and now even better than before! Not only do these pans look great fully polished with raised fins but they also offer the added benefit of reducing oil temperature to help your engine run cooler.
We have even added a strong magnetic drain plug to help protect your engine from destructive metallic particles floating in your oil. These Oil Pans fit: 260, 289, and 302. Also available “Cal Custom” Aluminum Finned Valve Covers (CSZ2-6A582-AF) and Air Cleaner (CSZ2-9600-AFK)

SCOTT DRAKE CLASSIC ALUMINUM VALVE COVERS

Made by Scott Drake, Classic Aluminum Valve Covers for small block Ford engines! These valve covers are die-cast from high-quality 383-3 aluminum alloy, & then given a durable powder-coated wrinkled finish or polished aluminum finish. They also feature a cadmium plated oil filler tube to help stop corrosion, an improved oil battle design to accommodate high-lift cam shafts, & will work with most roller rockers. Spark plug wire brackets & PCV grommet included. Available in a variety of styles.

Note: “COBRA” (S2MS-6A582-A/B and S1MS-6A582-P) and “MUSTANG” (CSZZ-6A582-A/B) versions are not made by Scott Drake, and will not clear roller rockers.

**Exhaust System**

**Exhaust Headers**

*Hi-Performance 6 Cyl. Exhaust Headers*

We believe that a properly modified 6 cyl. will put out as much usable low RPM horsepower as a V8. We offer both the single and dual outlet versions. Single outlet is recommended if no other modifications will be made. Dual outlets work best with Hi-Po Camshaft, 2V carb and Pertronix Ignitor. Single outlet also works well with these modifications. Dual outlet is for customers that want the look and sound of a V8. We recommend buying an exhaust port divider (part # C3OZ-9430-EPD) which smooths out air flow between the #3 and #4 cylinder. Fit Mustangs, Falcons, Rancheros, Comets, Fairlanes, Torinos, and Mavericks. See "Engine" category for Hi-Po Camshaft.

**Exhaust Headers, Hi-Performance 6 Cyl.**

- 64-69: Dual outlet, nickel plated, fits 170, 200, 250 C3OZ-9430-H2
- 64-73: Single outlet, nickel plated, fits 170, 200, 250 C3OZ-9430-H1

**JBA Big Block, Tri-Y Exhaust Headers**

JBA’s Tri-Y long tube headers for 390/428 give you the power you're looking for in a package that fits like no other. JBA’s designs are application specific to best fit the engine/transmission combination in your Mustang. They also feature big 1-3/4” primaries that flow in to 2-1/4” secondary tubes and terminate in a big 3” collector. Plus they are designed to give maximum ground clearance for street or track use. With heavy-duty stainless steel tubing, thick 3/8” laser-cut flanges and JBA sealing dome collector, you don’t have to worry about leaks caused by lesser materials.

*Note for JBA-6656-5: 69-70 cars with factory reinforced shock tower may have minor clearance issues. If you are running standard 390 heads versus 390GT heads we can special order you correct headers for the same price.*

**Exhaust Headers, JBA Big Block, Tri-Y**

67-70 Tri-Y, 390-GT, will not fit std. heads ........ JBA-6656-5

67-70 Tri-Y, 428CJ, will clear reinforced towers . JBA-6655-51

**JBA Shorty Exhaust Headers**

Custom built premium quality headers. Compare these features to the competition. Precision laser cut 3/8 inch flanges, Mandrel bent 14 gauge tubes, Patented fire cone which optimizes scavenging, lifetime warranty by maker, sealing dome technology, industrial nickel plating, installation instructions, gaskets and muffing hardware. We feel these are the best headers on the market. Note: 64-65 Mustangs will require 1966-1970 motor mounts and brackets for proper clearance (see "Engine" category)

HEATER HOSE
These are the exact copies, approved by Mustang Club of America. They feature the correct grooves running the length of the hose, correct colored stripe and part numbers, air conditioned cars have a 90 degree bend on one end of the hose when appropriate. Colored markings are very durable and don’t come off easily. Below part numbers are for our reference only and do not reflect part numbers on actual hoses.

RALLY PAC DUAL GAUGE HOUSING

Rally Pac housing and bezels are now available without gauges so that you may add your favorite gauges for a custom project. Our housing can be mounted on the steering column or under the dash with the use of various brackets, available separately. Modifications are required to make aftermarket 2 1/2" x 6 inch gauges fit our housing and bezels. Included in this package are 2 chrome inner bezel rings and 2 gauge mounting compression rings.

EXTERIOR TOUCH UP PAINT
These convenient 12 ounce aerosol cans are perfect for minor touch ups on the daily driver. Great for lower valances, door jams, underhood, inside trunk area and misc. spot repair. These are made from the original paint supplier to Ford in the sixties using the exact same lacquer formulas that Ford used. The 3rd digit in our part number is Ford’s paint code that you will find on your door data tag. Please note that due to the fact that most cars have been repainted and there are many types of paint (synthetic enamel, acrylic enamel, lacquers, clear coats, etc.) plus deterioration and fading of older paint we cannot guarantee a match. Note: Paint is not returnable.

**INSULATION & SOUND DEADENER**

**ACCOUSTISHIELD™ COMPLETE INSULATION KITS**

Along with the obvious benefits of automotive insulation, our customers report that their automotive air conditioning is greatly improved because the cool air produced by HVAC systems is captured and maintained inside the vehicle. Audio systems also perform better according to other customers. When the vehicle body is completely insulated, sound way transfer is virtually eliminated and audio system performance and clarity is greatly improved. Our customers report that they can reduce the speaker volume by as much as 50 percent with the installation of Acoustishield.

**HUSHMAT MEGABOND SILENCER INSULATION**

Eliminate road noise, vibration and add thermal insulation with premium damping products from Hushmat. Hushmat offers more than 18 years in automotive OEM experience! Hushmat Megabond Silencer is the perfect material to use to reduce heat transfer from your big engine, drive train or exhaust and reduces the high frequency noise caused by road surface variation (tire noise), engine noise, and wind noise passing behind trim panels. Aggressive butyl based adhesive on back for one step peel and stick application. Stick to sheet metal or fiberglass vehicle surface or directly onto aluminum surface of Hushmat Ultra vibration damping material for the ultimate COOL & QUIET interior.
